

Big Maths Online Baseliner

Introduction

The Big Maths Baseline is a simple challenge, designed to identify potential Learning Gaps in the basic skills of numeracy. You can register up to 30 pupils, with usernames set as pupil1, pupil2 etc (up to the number requested). Each pupil can log in using your Teacher ID and their username to complete the challenge, usually in less than 15 minutes.

On your Teacher Account, you can see which pupils have completed their challenges and whether any potential learning gaps have been identified. To see the skills that have been identified as potential Learning Gaps, you can click the Summary Report button to receive an email.

Pupils Login Information					
Name/Nickname	Username	Challenge Results	Progress Status	Status	Action
First Name Last Name	pupil4	CLIC 20	Complete - No Recorded Learning Gaps	Active	 
First Name Last Name	pupil2	CLIC 5	Complete - With Learning Gaps	Active	 
First Name Last Name	pupil1	CLIC 5	Complete - With Learning Gaps	Active	 
First Name Last Name	pupil5	CLIC 5	Not Started Yet	Active	 
Max Wil	max.wil	CLIC 11	Complete - With Learning Gaps	Active	 
Pupil Three	pupil3	CLIC 6	Complete - With Learning Gaps	Active	 

Why use the Big Maths Baseline?

Big Maths is unique, recognising all of the small steps that a pupil takes on their learning journey through the primary maths curriculum. The Baseline Challenge poses questions linked to key steps along that journey, in sets of 10 questions that are aligned to the Age Related Expectations of your curriculum.

We are happy to share a sample of our Lesson PowerPoints and 'spaced practice' resources linked to the most common potential Learning Gap (from your class) for your consideration. If you have any questions, please email BigMathsOnline@AndrellEducation.com.

By the way...

Every step in the Big Maths framework has Teacher Notes and resources to support you and reduce your workload.
